

ADVISORY FOR AQUARIUM KEEPERS

Personal Protection	Clean your aquarium at your own. BELIEVE US IT IS VERY EASY. Clean once or twice in a month as per the need.	Feeding and maintenance of your swimming gems	Must not forget these 
<ul style="list-style-type: none"> Wash your hands with soap for minimum of 20 seconds before and after the aquarium maintenance.  Wear gloves while cleaning the aquarium.  It is better to cover your face with some cloth like scarf/ handkerchief/ gamcha  	<p>Easiest way to take water out is use of siphon.</p> <ol style="list-style-type: none"> Any piece of garden pipe would work as siphon. Prime this pipe (siphon) by filling water. Insert one end in tank and let the water out. Only 60-70 % water is needed to remove. <p>NO NEED TO TAKE FISH OUT.</p>  <p>Refilling of new water</p> <ol style="list-style-type: none"> As in our house we receive municipal water supply which contain chlorine and may be toxic to fish so this water must not be put directly to fish tank.  Fill one or two buckets with water and leave it for 50-60 hours without putting the lid for removal of chlorine.  Leave it for 50-60 hours Now this water should be used as new water for refilling of fish tank.  Cleaning and water exchange is over and fish tank is now ready.  	<ul style="list-style-type: none"> At this lockdown period give food only once a day and also reduce the quantity of food. If fish food is exhausted no need to worry. Soak "Gehun ka daliya" for few hours and can give to fish to eat. (half teaspoon for 4-5 fish is sufficient) Finely chopped goat liver can also be given to carnivore fish to eat. Open the clogged filter and clean it as and when needed. Give two/three breaks to the air pump for about 25-30 minutes to cool down in 24 hours. Especially, stop air pump when feed the fish. 	<ul style="list-style-type: none"> Washing of hands with soap for minimum 20 seconds is a must before and after every water exchange in tank, feeding to fish and filter cleaning etc. Keep all the pipes used as siphon, mugs, hand nets etc. for sun drying after every use.  Use online advisory from DCFR FOLLOW LOCKDOWN AND STAY SAFE. <div data-bbox="1470 1039 1995 1429" style="border: 2px solid yellow; border-radius: 50%; padding: 20px; text-align: center;"> <p>I ALWAYS FOLLOW LOCKDOWN WHY CAN'T YOU FOR FEW DAYS ONLY?</p> </div>
