**Name of the Institute: ICAR-Directorate of Coldwater Fisheries Research,
Champawat
(Experimental Fish Farm & Field Centre)**

Activity name: Awareness on utilization of organic wastes/generation of wealth from wastes in MGMG adopted village in Champawat

An awareness programme was organized at village Mudiyani (Champawat), by all the staff members of the Experimental Fish Farm & Field Centre on the utilization of organic wastes, which aimed to educate the community about the benefits of managing organic wastes effectively. They were briefed about the impact of organic wastes, when managed in a right way. The method of segregation of the organic wastes was elaborated in detail as to how the kitchen and home wastes can be converted into compost. The villagers expressed a willingness to make compost at home and engage in local waste reduction initiatives.

The awareness programme on the utilization of organic wastes successfully met its objectives, fostering a community-focused approach to waste management. Continued efforts and follow-up activities will be essential to maintain momentum and ensure long-term behaviour change.
