

Date: 16.10.2024

Name of the Institute: ICAR-Directorate of Coldwater Fisheries Research, Bhimtal (campaign carried out at the Experimental Fish Farm & Field Centre, Champawat)

Activity name: Cleaning of public places in champawat

Cleaning of the public place Sitakund in Champawat was carried out under the special campaign 4.0 by the staff members of the Experimental Fish Farm & Field Centre, Champawat highlighting the current status, key challenges, activities undertaken, and recommendations for the effective cleaning and maintenance of public places.

The campaign mainly focused on waste collection, maintenance of walking paths, daily sweeping, garbage removal, trimming of grasses and plants. The cleaning of public places is essential for maintaining a healthy, vibrant, and sustainable environment. While the cleaning activities carried out have brought significant improvements, long-term results, which will depend on the continuous involvement of the local authorities, citizens, shop keepers and businesses.
