

Special Campaign 4.0

Dated: 19.10.2024

Name of the Institutes: ICAR-Directorate of Coldwater Fisheries Research, Champawat

Activity name: Cleaning of pocket-B at Experimental Fish Farm, ICAR-DCFR Champawat

Under the Special Campaign 4.0, cleaning activity program was carried out in the Pocket B area of the Experimental Fish Farm and Field Centre, Champawat. The cleanliness activity were mainly focused on the remove debris and pollutants from the pond area, to maintain and restore the integrity of the pond dyke, to promote a healthy ecosystem within the pond. The cleaning of the pond area and dyke has yielded positive results, improving both the ecological health and visual appeal of the site. Ongoing maintenance and community involvement are essential to sustaining these improvements.
