

Special Campaign 4.0

Dated: 20.10.2024

Name of the Institutes: ICAR-Directorate of Coldwater Fisheries Research, Champawat

Activity name: Organizing Workshops/ awareness camp on technology demonstration of agriculture technologies for conversion of waste to wealth in MGMG adopted village

The demonstration of agricultural technologies aimed at converting waste to wealth was conducted by the staff members of the Experimental Fish Farm and Field Centre, Champawat in the Banlekh village to promote sustainable farming practices, enhance soil fertility, and improve farmers livelihoods. The main highlights of the awareness program were to educate farmers on sustainable waste management practices, to showcase technologies for converting agricultural and organic waste into valuable resources, to promote increased productivity and income generation through innovative practices. The demonstration of agricultural technologies for converting waste to wealth in Banlekh village has shown promising results in promoting sustainable practices. Continued education and support will be essential in enabling farmers to fully realize the benefits of these technologies.
