

Date: 19.09.2024

Name of the Institute: ICAR-Directorate of Coldwater Fisheries Research, Bhimtal

Name of Activity: Swachhata Samwaad

A team of ICAR-DCFR visited **Primary School, Ghingrani, Bhimtal** and organised dialogues and discussions with the students of the primary school alongwith their teachers. They were questioned on swachhata; what initiatives are being taken for a clean and green environment and the cleanliness measures to be taken to clean the surroundings and to save the environment.

In a different session on use of wealth from wastes, the students enjoyed making paper bags, envelopes etc. from the waste newspapers to cut the use of polybags. The students were made aware to curb the single use plastic (SUP) and discourage plastic use. Composting of kitchen and home waste materials, promoting clean & green technologies and organic farming practices were some other topics of discussion during the session.

Different activities at Primary School, Ghingrani, Bhimtal
